Experience

UX/UI Design

Freelance | MAY 2022 - Present

- I created information architecture diagrams, wireframes, user journey maps, interactive prototypes, and high fidelity wireframes.
- Understand end-user requirements and create overall UX concept and strategy.
- interviewing users and conducted usability sessions to understand pain points with the product and communicating the UX strategy through our design criteria.

UX/UI Design Intern

Code Netro | SEP 2021 - FEB 2022

- During my internship, I worked closely with UX designers in designing products from scratch to hand off the design to the development team.
- Generating advantage of user insights in the user research to identify the user behaviors.
- Researching on product features and user motivation factors and Using Ideation techniques to come up with solutions

Front-End Developer

Freelance | OCT 2018 - AUG 2021

- I collaborated with designers & developers to manage wide of projects from design to test and up to production.
- Implemented responsive cross-platform websites, mobile apps and landing pages from concept with my clients.
